

Marlin Bronze

Movement

Automatic, caliber Anonimo 01.0 on base SELLITA SW200 with rotor manufactured upon Anonimo specifications; 21 jewels, colimaçon finish, adjusted 4 positions, 28.800 A/h. Power reserve about 40 hours.

Functions

Hours, minutes, central seconds; date window.

Watch Case

Sand-blasted and satinated special bronze alloy.

Dimensions: maximum length mm 55.50, maximum diameter crown included mm 52.50, nominal diameter mm 46.50, maximum thickness mm 15.50; wrist strap 24.00/20.00 mm.

Monobloc construction in which a sole element works as central part of the case (carrure) and back cover, closed by one bezel on the upper side. Bezel closing is ensured by tie rods and five external stainless steel Thorx screws. Great dimension screw locked stainless steel crown at h. 4 for comfortable hold. Automatic helium expulsion valve at h. 10 to be used in pressurized hyperbaric chambers in overpressure conditions. Extra thick domed sapphire crystal.

Wrist strap is provided with hexagon-headed security screws and one lower screw with shaped head. This last screw allow the access for the release of the widening stem; a specific tool is required to unscrew it.

Water Resistance

150 ATM

Dial

Oversized and extra thick dial with hour indexes treated with luminous coating for superior day/night readability. Hands treated with luminous coating. Date window.

Wrist Strap

Manufactured and hand finished in patented Kodiak process calfskin to allow for extended immersion in fresh and sea water (24 continuous hours). Exclusive Anonimo stainless steel buckle or stainless steel folding clasp with security push button.
